

Amazon Papyrus Pays Back to the Society Through Corporate Social Responsibility

“At Amazon, we are passionate about our responsibilities towards the society. The CSR activities help us to integrate our business operations with our responsibilities towards the community. It is a “win-win” as we help the communities in which we work and we inspire our staff”.
Mike Grundy, CEO, Amazon

Besides a focus on its core business, Amazon Papyrus has shown a strong obligation to serve and pay back to the society through various activities related to Corporate Social Responsibility (CSR). All these efforts help Amazon Papyrus to understand Social, Economic and Environmental concerns hence integrating the society with its business operations. Over the last few years, Amazon Papyrus has made considerable contributions to protect and improve the welfare of under privileged members of the society. At the same time, Amazon has run regular awareness campaigns on Safety and Environmental Sustainability-Energy, Water and Air Quality.

As a reputed business organization in its market place, Amazon Papyrus (Amazon) understands its responsibilities not only towards its business entity, stakeholders and customers, but also for the society as a whole. Accordingly the Amazon has supported various initiatives such as -

Education	Community	Market Place
School Buildings	Old Age Home	Environmental Sustainability -Water/Energy/Air Quality
Scholarships -Gifted Students	Unprivileged Children	Educational Seminars -Technological Advances
Youth Development	Children with Special Needs	
	Health and Road Safety	

As part of the CSR activities at Amazon Papyrus, our **OVERALL GOAL** is to not only enhance the life experience of individuals and that of the community as a whole but also improve environmental sustainability.

Here are some of our activities related to CSR -

Education

For Amazon, the education has been one of the priorities under CSR activities. With this in mind, we wanted to support these projects where students can study in a safe and stable school environment irrespective of the weather conditions.

Under this scheme, Amazon had sponsored the buildings of two schools and offered scholarships to talented and needy students at Sichuan and Shanxi Universities -

- In 2012, sponsored the building of a primary school in the Bogalay region, South Myanmar.

- In 2014, sponsored the building of a primary school in Guangxi, China.

Amazon Scholarship Program

We established “Amazon Papyrus Chemical Scholarship Program” at universities of Shanxi and Sichuan in China. Since 2007, we have sponsored more than 150 students as part of encouraging the talent to join pulp and paper industry after the graduation.

Community

We regularly organize the CSR events for the society such as the outings with families of single parent, visit to centers for the elderly and the child from dysfunctional

families, elderly's home visits. Our regular visits are aimed to bring smiles on the faces of the people we meet in these centers. We also try to help them financially wherever needed.

Amazon is committed to make concerted interactions with the various elements of the society facing socio-economic issues. We are sure that our efforts will help them to integrate well with the mainstream society. We will continue to accomplish our CSR goals by regularly looking for such opportunities to work with Schools, Community Centers and like-minded organizations. At Amazon, we are sure that our efforts will bring desired changes in the life of under privileged individuals. At the same time while we work with various communities, we will also remain focused on an overall Environmental Sustainability as well.
